

TOGETHER,
WE SHAPE THE FUTURE
OF WELDING AND CUTTING.
PRODUCT CATALOGUE

EDITION No. 10

As fabricators and fabricators' friends, we do some pretty epic work. And none of it would be possible without each and every one of us – the welders,

SKYSCRAPERS. the distributors,
MUSCLE CARS. the engineers,
WIND TURBINES. the tools of
OIL RIGS. the trade.

Across the welding and fabrication world, the skills we have and the everyday work we do varies greatly, but our commitment to that work and to how fabrication moves the world forward is a constant that keeps us all reaching for more.

Together, **we shape the future** of welding and cutting.

THE FUTURE

KEEP UP WITH OUR NEWEST SOLUTIONS

We highlight all of our new and recent product launches in our **Launch Magazine**.

Learn about ESAB solutions engineered to deliver multi-voltage flexibility, superior multi-process arc control, lower consumables cost, user-friendly operation and more.

Visit esab.com/launchmagazine to subscribe today.

Arc Welding Processes

Gas Metal Arc Welding (GMAW, MIG)

This most flexible metal joining process involves an arc established between the workpiece and a wire electrode, which is continuously fed by a wire feeder through a torch.

The arc continuously melts the electrode to form the weld puddle.

An appropriate gas or gas mixture shields the weld area from atmospheric contamination.

The GMAW process has the advantages of high deposition rates, speed, excellent weld quality, minimal distortion of the workpiece, and no stub loss.

GMAW applications include several distinct process variations. Selection depends largely on the workpiece thickness and welding position:

Short Circuiting (Short Arc, Dip Transfer)

Involves a small fast-freezing weld puddle. Metal is transferred from the electrode to the puddle by repeated short circuits. Small diameter wires are used and the process operates at low currents and voltages. Short arc is used for welding thin gauge metals in all positions and for vertical and overhead welding of heavier sections.

Spray Arc

Electrode metal is transferred to the weld puddle as discrete droplets. Deposition rate is high and there is little or no spatter. With solid wire, the technique is used for 1/8 in. (3.2 mm) and thicker workpieces and for downhand welding.

Pulsed Spray Arc

The welding current is varied rapidly between a high and a low value. Metal is transferred to the work only during the high current period. The high peak current provides excellent arc stability. The period of low current maintains the arc and reduces the average current, making it possible to weld thinner gauge materials and to weld in all positions using larger sized wire electrodes than otherwise possible.

Cored Wire (FCAW, MCAW)

The electrode is fabricated from strip, enclosing a core of flux and metal which protects and refines the weld puddle and controls bead shape. Some cored wires can be used without external shielding gas. Smaller diameter wires can be used for all position welding. The addition of fluxing, alloy and slag-forming materials often allows high deposition rates, higher welding speeds and improved all-position capability compared with solid wires. This makes cored wire the material of choice in many high-production applications.

Shielded Metal Arc Welding (SMAW, MMA)

In this first practical arc welding process, the arc is established between a wire rod and the workpiece. The rod is coated with materials, which generate a gas and form a slag to protect the weld puddle and the solidifying weld metal from the atmosphere.

The coating may also supply alloying and refining ingredients, and the slag may help shape the weld bead, especially in vertical and overhead applications.

Electrodes are available for welding most carbon, low alloy, and stainless steels, some non-ferrous metals, and a wide range of maintenance and repair applications.

Light-duty work is often done with AC power from low cost transformers; production work usually involves DC power from heavy-duty rectifiers.

Gas Tungsten Arc Welding (GTAW, TIG)

Introduced by ESAB, the GTAW process produces welding heat from an arc between a non-consumable tungsten electrode and the workpiece. An inert gas, usually Argon, shields the arc and the workpiece.

Welding consumables, if used, are added separately. Because the process uses totally inert shielding gas, welds of the highest quality are produced, and almost any metal can be welded.

Additional Technical Information

ESAB Technical Service Representatives are available to answer your questions. We also recommend that you take advantage of a series of handbooks published by ESAB which provide excellent guidance on the use of the arc welding processes.

In addition, there are references from other sources which can be very helpful in achieving the best possible results.

Contact your local ESAB representative to find out more.

SELECT THE IDEAL **REBEL** TO SUIT YOUR **APPLICATION.**

This selection guide will assist in choosing the right machine to meet your requirements. Consider the questions below and find the corresponding information next to each machine.

What input voltage is available at the job site?

Single phase (1ph) works well for 0.8 – 1.0 mm wire applications and short welds with 1.2 mm flux-cored wire. For 1.2 mm wire applications and higher duty cycles, a three phase system would be more suitable.

Where will the machine predominantly be used?

For field work, consider one of the machines designed for 5 kg spools (200 mm). For workshops with higher wire consumption choose a machine capable of 18 kg spools (300 mm).

What output power level is required?

Choosing a machine with higher output power will allow the use of thicker wires and flux-cored wires in a production environment.

Working with thin sheet metal?

Consider selecting the Rebel EMP 205ic AC/DC for the additional TIG capabilities. AC Frequency up to 400 Hz for increased focus of the arc and DC Pulse TIG for greater heat control even on thin materials.

Rebel™ EMP 205ic AC/DC & EMP 215ic Portable, true all-process welding system

esab.com/rebel

EMP 205ic AC/DC

- True All-Process – excellent performance on MIG, Flux-Cored, MMA (including 6010 electrodes), DC TIG and AC TIG (EMP 205ic) industrial applications
- EMP 205ic AC/DC includes advanced AC TIG Features like High Frequency Starts, Frequency Adjustment up to 400 Hz, Expanded Balance & Offset Control and Dual Current. DC TIG also offers a Pulse Mode to 500 Hz
- sMIG Technology - exclusive sMIG (“smart MIG”) feature continuously learns and adapts to the operator’s welding technique to provide a stable arc and superior, repeatable welds; increases productivity for the experienced welder, and reduces training time for novice welders
- Unique, five-handle roll cage industrial design and unibody steel construction in a lightweight, highly portable unit
- TFT Multilingual Display with 4 programmable memory locations for each process, trim adjustment, inductance control, pre/post flow control and spot weld setting
- Rebel Series models come ready-to-weld out of the box with Professional Grade accessories

Industrial, multi-process packages

esab.com/rebel

EMP 235ic

EMP 320ic

- True Multi-Process – excellent performance on MIG, TIG and MMA
- Weighing in at 28.6kg and 31.4 kg, the machines can be lifted manually or transported on a trolley to provide unmatched mobility
- A high duty cycle combined with a robust 4-wheel wire feed system offers both high speed and torque, making it the perfect tool for the most demanding jobs
- Full MMA performance with electrodes up to 5 mm and excellent Lift TIG performance with adjustable pre/post gas flow and weld current ramp up/down
- Two gas inlets, one for MIG and one for TIG where both can be connected simultaneously. Built in TIG gas solenoid valve on the front of the machine eliminating the need for a manual valve on the TIG torch

MULTI-PROCESS
machines

Warrior™ 400i & 500i CC/CV Powerful, multi-process welding machines

MULTI-PROCESS machines

Warrior 500i shown with Robust Feed PRO, cooling unit and trolley

- Warrior™ is a reliable multi-process welding equipment designed for heavy duty productivity with up to 500 amps delivered
- Durable and rugged – Suitable for outdoor and indoor use in rough environments. Warrior paired with Robust Feed PRO, with its robust and weatherproof enclosed design provide the ideal solution whenever portability and durability are key
- Easy-to-use – clear and intuitive user interface to get started quickly with glove-friendly knobs for quick and easy adjustments
- High-Duty Cycle – for long runs across a variety of applications
- Inverter Technology – Warrior brings the outstanding arc performance and energy savings you expect from an inverter. Along with increased energy efficiency and more power from a lighter, smaller, and more portable unit, Warrior provides the simple functionality welders want at a competitive price
- Wide input voltage range to support regional requirements

¹⁾ Extension Kit required when Wire Feeder Wheel Kit is used in combination with Trolley.

²⁾ Not for use with Robust Feed. Counterbalance Arm requires Trolley 0349313450 and Stabiliser kit 0465509880.

³⁾ Not for use with Robust Feed.

⁴⁾ With dual-circuit cooling system for less heat, better wire feedability and fewer production stops to change wear parts.

Warrior™ 750i CC/CV

Powerful multi-process welding machine

Warrior 750i shown with Robust Feed PRO

- Warrior™ is a reliable multi-process welding equipment designed for heavy duty productivity now with an output of up to 850 amps
- True multi-process package –enables gouging 13 mm electrodes with outstanding performance
- Inverter Technology – Warrior brings the outstanding arc performance and energy savings you expect from an inverter, along with increased energy efficiency and more power
- High-Duty Cycle – for long runs across a variety of applications
- Durable and rugged – Suitable for outdoor and indoor use in rough environments. Warrior paired with Robust Feed PRO, with its robust and weatherproof enclosed design provide the ideal solution whenever portability and durability are key
- Easy-to-use – clear and intuitive user interface to get started quickly with glove-friendly knobs for quick and easy adjustments
- Wide input voltage range to support regional requirements

Aristo® 500ix

Portable heavy industrial pulse welding machine

Aristo 500ix shown with Robust Feed U6, cooling unit and trolley

MULTI-PROCESS machines

- Aristo 500ix is a portable heavy industrial pulse power source with robust and reliable mechanical design. Together with Robust Feed U6 or Pulse it is the perfect solution for demanding pulse applications.
- Advanced pulse functionality reduces heat input and minimises spatter
- Up to 250 pre-programmed synergic lines (U82 Plus)
- QSet™ intelligent welding system
- Crater filling, adjustable burn back time and SCT (short circuit termination) options for defect-free weld terminations
- Durable and rugged – IP23 rating for outdoor and indoor use in rough environments
- Compatible with Robust Feed U6 and Pulse, rugged and portable feeder units with excellent feeding performance
- MMA and gouging available from feeder

Aristo® Mig 4004i Pulse

Light weight, multi-process inverter power source

esab.com/digital

WeldCloud

Aristo Mig 4004i Pulse shown with U8₂ Plus, cooler & Trolley

- The updated Aristo Mig power sources provide substantially improved arc welding performance, and it's designed for high-productivity and high-quality welding applications
- integrates fully with ESABs industry-leading WeldCloud™ online data management platform via Wi-Fi, mobile cellular or hard-wired Ethernet communication
- Advanced pulse functionality reduces heat input and minimises spatter
- Up to 250 pre-programmed synergic lines (U8₂ Plus)
- QSet™ intelligent welding system
- Crater filling and adjustable burn back time for defect-free weld terminations
- Pre-and post-gas flows
- Improved power factor of 0.95 and an efficiency of 89.5%
- TrueArcVoltage™ system measures the correct arc voltage at the contact tip (together with ESAB torches)

MULTI-PROCESS machines

Aristo® Mig U4000iw/5000i/U5000i

Advanced synergic multi-process welding machines

esab.com/digital

WeldCloud

- The updated Aristo Mig power sources provide substantially improved arc welding performance, and it's designed for high-productivity and high-quality welding applications
- Professional TIG DC welding with U4000iw and U5000iw, additional features; high frequency, LiftArc™ striking and TIG pulse-welding with DC
- 5000i/U5000i integrates fully with ESABs industry-leading WeldCloud™ online data management platform via Wi-Fi, mobile cellular or hard-wired Ethernet communication
- Advanced pulse functionality reduces heat input and minimises spatter
- Up to 250 pre-programmed synergic lines (U8₂ Plus)
- Easily transfer weld data between machines and PC by storing data to a USB stick
- QSet™ intelligent welding system
- TrueArcVoltage™ system measures the correct arc voltage at the contact tip (together with ESAB torches)

Origo Mig C200, incl. MXL 201 3 m	0349308290	Origo Mag C171, incl. MXL 201 3 m	0349311280

Delivery includes power source with wheels, 3 m mains cable with plug, 1.5 m gas hose with clamp and quick connector, 3 m return cable, MXL MIG torch, wear parts for 0.6-0.8 mm wire (0.8-1.0 for C250) pre-assembled and a safety chain for gas bottle.

Options & Accessories

Digital display instruments kit	0349302598	Pressure reducer with flux-meter	0760030300
Transformer kit for CO ₂ preheater (42V – 50/60 Hz)	0349302250	Polarity inversion kit (for Origo Mig C170)	0349309310

MIG Torches

For torches see separate page on the MXL MIG torches range.

Origo™ MIG C280 PRO/C340 PRO/C420w PRO

Compact step controlled welding power sources

- Very good welding properties - stable arc and very finely matched voltage steps
- Also suitable for the welding of aluminium and GMA brazing of galvanised sheet metal
- Galvanised metal housing with optional air filter, designed for use in harsh environments
- Two or three inductance connections adjusting the arc dynamics
- 4-roll wire feed system available, ideal for production welding
- Professional ESAB PSF torches included in delivery
- Easy to switch polarity when using self-shielded cored wire
- Water-cooled model C420w PRO with ELP, ESAB LogicPump (the water cooler starts automatically when the water cooled MIG torch is connected, preventing overheating)

Caddy® Mig C160i, C200i

Portable MIG/MAG welding power sources

- Compact, portable inverter units
- One knob adjustment of heat input
- Lightweight <12 kg (incl. torch, return and mains cable)
- Single phase 230 Volt 50/60 Hz
- Generator-compatible
- Suitable for 100-200 mm spools
- High quality welding torch MXL 180
- QSet™ intelligent welding system
- Tool holder
- Easy to wrap torch and cables during transport
- Easy to switch polarity when using self-shielded cored wire

Robust Feed PRO

Ultimate robustness and portability

 esab.com/robust

- Large sun-friendly display and clear controls make set up efficient and easy when wearing gloves
- Durable, drop-proof housing that withstands demanding applications
- Great portability with ergonomic handles, 5 lifting points and safe for crane lifting handles
- Weatherproof, enclosed design that withstands rain from all directions and inside heater ensures the filler metal is kept dry
- Protected cable connectors and sturdy strain relief for interconnection cable reduces maintenance
- Works as great in the field as in workshops, on a trolley, with or without wheel kit, and other options and accessories

Robust Feed Pulse & U6

Portable and rugged wire feeders for pulse applications

- Fully portable feeder offering the benefits of pulse - reducing weld spatter and post weld clean up, controlling bead appearance and profile, increased speed for position welding and more depending on the application
- Durable, drop-proof housing that withstands demanding applications
- Great portability with ergonomic handles, 5 lifting points and safe for crane lifting handles
- Weatherproof, enclosed design that withstands rain from all directions and inside heater ensures the filler metal is kept dry
- Protected cable connectors and sturdy strain relief for interconnection cable reduces maintenance
- Works as great in the field as in workshops, on a trolley, with or without wheel kit, and other options and accessories

Warrior™ YardFeed 200

Compact, sturdy wire feeder for hard-to-reach areas

- Pre-settable wire feed speed and small footprint to conveniently fit through manholes and portals with the flexibility to weld in hard-to-reach areas
- Sturdy design features a high-strength steel casing and steel frame to protect controls and connectors
- Easy handling in cramped spaces
- 4-wheel feeder mechanism with encoder feedback for superior wire feeding
- Sun friendly digital V/A and wire feed speed displays
- Variant with water connectors for water-cooled torches available

Specifications

Input Voltage	Welding Output	Wire Feed Speed	Max Spool Capacity	Wire Diameter

Warrior™ Feed 304

Simple functionality, multi-process wire feeder

- Economical wire feeder with the same benefits as it's partner supply; simple functionality, rugged durability, and outstanding performance for 0.8 –1.6 mm wire
- 4-wheel feeder mechanism with encoder feedback for superior wire feeding
- Sun friendly digital V/A and wire feed speed displays
- Practical spool cover for use in situations when you need to protect the wire
- Short Circuit Technology (SCT) functionality which sharpens the wire at the termination of a weld to promote better arc starts and eliminate clipping wires

Aristo® Feed 3004

Advanced synergic multi-process wire feeders

- Multiple panel options with U6, U8₂ and the MA25 panel specialised for Steel and Aluminium applications
- New drive motor offers more torque for improved arc starts, more consistent speed and less noise
- Redesigned drive rolls and 4-wheel feed mechanism for more positive feeding performance and reduced risk of wire shavings
- Short Circuit Termination (SCT) technology sharpens the wire at the end of each weld to promote better arc starts
- Feed 3004 can be equipped with a counter balance arm, lifting eye or a wheel kit for increased mobility
- TrueArcVoltage™ system measures the correct arc voltage at the contact tip (together with ESAB torches)

WIRE FEEDERS

Aristo® U8₂ Controller

Developed for durability and usability

WIRE FEEDERS

QSet™ is the best single parameter automatic arc system on the market for the perfect short arc. The advantages are enormous! You set up the machine with the appropriate gas/wire combination, press the torch switch and start welding within seconds.

The machine determines the optimum parameters and makes any changes as required in a fraction of a second. The wire MMA out which is normally a constant length in MIG/MAG welding, can be varied with QSet™.

Whether you are close to the work piece with the torch or so far away that the gas protection almost ceases, the welding arc remains unchanged - always perfect. Unbeatable in deep seams, if you have to weld around corners or are welding upwards coming out of the downhand position.

Utilized with CO₂ gas you can weld with QSet with extremely low levels of spatter and can drastically reduce the gas costs, compared with mixed gas, without any loss of quality.

QSet is ideal for welding in restricted positions, root welding, GMA brazing and for reproducible results in the series production of parts. QSet is also available in many other ESAB controller / machine combinations.

Synergic Lines

In the Aristo U8₂ Plus you have more than 230 synergic lines available to you for your welding applications. From construction steel to Super Duplex, from aluminium to Ni basic alloys or for applications of hard metal. You can create customized synergic lines yourself for any desired material and any combination of protective gas and save them as new synergic lines. You can transfer data via the USB connection, to another Aristo U8₂ or to your computer for data backup or exchange by e-mail.

The Aristo U8₂ control panel is used in combination with Aristo Feed 3004 and 4804 to set and adjust welding parameters. The U8₂ is developed to meet the most demanding requirements yet is designed to be simple and easy to use. The system allows you perform Pulsed or Non pulsed welding with solid or flux cored wire on mild/carbon steel as well as on Stainless. Using solid wire, you can also achieve optimal results in aluminum.

- Multilingual, menu available in 18 languages
- Knobs for quick setting of wire-feed speed and voltage
- USB connectivity for storing weld data
- Qset™ for optimum short arc setting
- Standard package synergic lines (92)

Additional U8₂ Plus features:

- Complete package synergic lines (>230) and user defined synergic lines
- SuperPulse™ functionality
- Limit editor to set and measure values, file manager, auto save mode and production statistics

SAT – Swift Arc Transfer™ (Robotic Welding Only)

Swift Arc Transfer (SAT) is a high productivity GMAW process using AristoRod™ non-copper coated wires with Advanced Surface Characteristics at travel speeds well beyond the limits of normal spray arc welding.

The advantage AristoRod non-copper-coated wire over copper-coated wires is that it does not contaminate the feed system with copper particles. Synergic lines are available for three AristoRod wire sizes and various shielding gases.

SAT produces flat welds with good penetration and without undercut. An additional advantage is the low heat input, resulting in less deformation. SAT is developed for robotic, automated and mechanized welding, and suited for fillet and overlap welds in thin to thick plate, in downhand positions.

SAT uses ESAB inverter power sources together with the Robofeed 3004 wire feeder for wire feed speeds up to 30 m/min in conjunction with U8₂ Plus control unit. ESAB provides a complete package of equipment, consumables, and synergic lines as well as the expertise to successfully implement the SAT process.

Quality Control

For storage of the measured values you are offered two options in the form of the setting limits and measuring limits. The setting limits prevent the operator from inputting excessively high values for the welding process. The measuring limits ensure that the power source does not exceed the input values. Up to 16 User Accounts on three levels with various access rights and blocking codes can be used to prevent unauthorized persons from making changes.

Production Statistics

The total arc time, total quantity of material and the number of welding processes can be logged per production statistics item. In addition, the arc time and amount of material for the last welding process are recorded, the total weld metal deposited can be recorded – and collected by WeldCloud™.

Aristo® SuperPulse™

Innovative process for heat input control

An additional feature of the Aristo U8₂ Plus control is Aristo SuperPulse - a further development of the Pulse/Pulse concept, giving full control over the heat input and thereby expanding the scope of application of the GMAW process resulting in better gap bridging, reduction in distortion, and better balance of the weld penetration and its profile.

SuperPulse combines the relevant advantages of the various types of arc. For example, the quality of the pulsed arc with the productivity of the spray arc. Or pulse arc with short arc, to introduce the least amount of heat into the thinnest sheets of metal.

Or the combination of two pulsed arcs with different frequencies, for example, for the MIG welding of aluminium with a TIG look. It also allows the working range of larger wires to be expanded increasing productivity.

<p style="text-align: center;">Pulse/Pulse</p>	<p style="text-align: center;">Pulse/Short Arc</p>	<p style="text-align: center;">Spray/Pulse</p>
<ul style="list-style-type: none"> ■ All position weldability ■ Thicknesses from 3 to 12 mm ■ Exceptional results on Aluminium and stainless steel ■ Aesthetically pleasing welds with uniform bead 	<ul style="list-style-type: none"> ■ Excellent performance on thin stainless and Aluminium 1 to 5 mm ■ Higher travel speeds compared to TIG 	<ul style="list-style-type: none"> ■ Better overall results on thicker weldments [6 mm and over] ■ Better control of fusion and penetration ■ Ability to weld thick Aluminium vertical up with no weaving

WIRE FEEDERS

Aristo SuperPulse Benefits:

- Easier positional welding
- Uniform penetration
- Less sensitive for root gap variations and unequal heat transfer
- GTAW weld appearance with the GMAW process
- Suitable for automated welding, e.g./with ESAB Railtrac and Miggytrac mechanised welding tractors
- Extends the working range for larger wire sizes
- With its precisely adjustable heat input and depth of penetration, Aristo SuperPulse can solve difficult welding tasks and increase productivity

Remote Connection Cable for CAN

Part Number: 0459960880

Requires MTA or M1 10Prog CAN remote)
CAN 4 pole - 10 pole 5 m.

Miggytrac/Railtrac Remote Adaptor for CAN feeders MA23, MA24, U6, U8₂

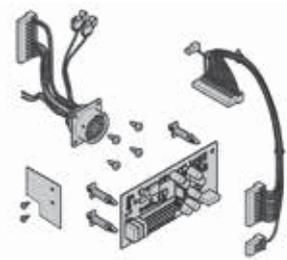

Part Number: 0459681880

Remote Kit - WarriorFeed 304

Part Number: 0465451880

For use with Handheld Remote Unit M1

Remote Kit Miggytrac/Railtrac WarriorFeed 304

Part Number: 0465451881

WIRE FEEDERS

Foot pedal T1 Foot CAN

Part Number: 0460315881

incl. 5 m cable with 10 p plug, for connection to the feeder with U6 panel.

Part Number: 0460315880

incl. 5 m cable with 12 p plug, for connection to the feeder for U8₂

Quick Connector Marathon Pac

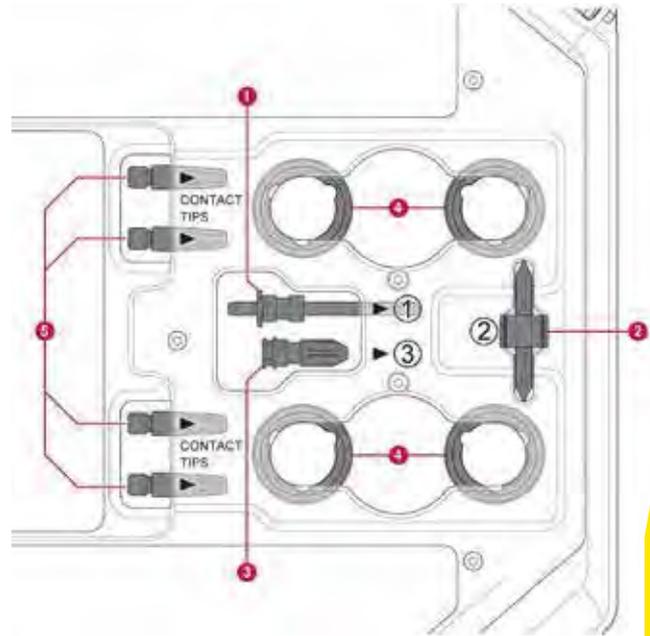

Part Number: F102440880

Allows connection of QCA Adaptor to inlet.

WIRE FEEDERS

Rogue ES 150i, 180i, 180i PRO, 200i PRO

Portable solutions for professional welding

- Superior Arc characteristics – Smooth, Stable performance
- Generator Compliant – Suitable for use with generators (recommended 7 kW)
- Easy to Use – Set the welding current and weld with excellent result
- Practical Design – makes the power source easy to carry which enables use at almost any work site
- Robust Design – IP23S Designed for Fabrication Shop or Site application
- PFC ensures a stable arc, resistant to power fluctuations even while working on long extension cables up to 100 m (*PRO version only*)
- Optional Analog remote control (*PRO version only*)

Rogue ET 180i, 200i PRO

Portable solutions for professional welding

- Excellent high frequency TIG start ensures no failures on ignition with superior arc characteristics for smooth and stable performance
- Easy to Use – set up of welding parameters is simple and intuitive
- Robust Design – IP23S designed for both fabrication floor or site applications
- Advanced TIG controls for full cycle control to match every application you need, and pulse feature up to 500 Hz for perfect control of heat input
- PFC ensures a stable arc, resistant to power fluctuations even while working on long extension cables up to 100 m (PRO version only)
- Optional remote current adjustment from: TIG torch, foot pedal, hand remote control

Renegade™ ES 300i & ET 300i/300iP

Multi-voltage, industrial MMA/TIG machines

esab.com/renegade

ES 300i

ET 300i

ET 300iP with cooling unit

- ES 300i has highest power-to-weight ratio in its class weighing in at 15 kg and producing 300 A at 40% duty cycle (3 ph)
- Small, lightweight system can virtually go anywhere on the jobsite; its three handle design makes it easy for transportation and maneuvering through manholes and other hard to reach areas
- ES 300i incorporates excellent performance with 6010 (cellulosic) electrodes and additional functionality to tailor Arc Force for a softer or crisper arc through a 6010 mode
- With an excellent TIG operational range from 5 to 300 A, you'll have the confidence to tackle a broad range of material thicknesses
- Intuitive Interface – the machine's digital readout display, along with large buttons with excellent feedback and controls, make it easy to set parameters and read them from a distance
- Cable Management – an integrated latch system helps control cables so they can be secured to the machine, making it easy to pack up and go
- ET300iP - Pulse HF TIG. 0.1 - 1000 pulse frequency range, the widest range in its category giving you maximum precision TIG welding capability including better arc control, penetration and increased travel speeds
- Modular system with tool-less connection to water cooler and trolley

Caddy® Arc 151i, 201i, 251i

Durable, robust and portable welding machines

251i with A32 control panel

201i with A33 control panel

- Easy to Use – Set the welding current and weld with excellent result
- Practical Design – makes the power source easy to carry which enables use at almost any work site
- PFC ensures a stable arc, resistant to power fluctuations even while working on long extension cables up to 100 m
- Basic TIG controls with either scratch start or Live TIG start, just equip a TIG torch with a gas valve, a gas regulator and a cylinder of gas and you are ready to go
- Different control panel options available

TIG Torches

For torches see separate page on the SR-B TIG torches range.

Aristo® Tig 4000iw

Robust and powerful MMA/TIG welding machines

- Inverters based on IGBT technology - high performance and reliability
- Excellent welding properties - high utility and high quality
- Housing with frame made of Alutech™ extruded profile, can be lifted by crane
- Dust filter included - reduces possible failures due to deposits of for example grinding dust
- Water cooler with ELP, ESAB LogicPump (the water cooler starts automatically when the water cooled TIG torch is connected, preventing overheating)
- MMA electrodes up to 6.0 mm and Carbon arc gouging up to 8.0 mm
- Available as non pulsed and as pulsed for thin sheet metal applications

Specifications

Input Voltage	Setting Range	Max. Output	Power Factor @ Max Current TIG	Efficiency @ Max Current TIG	Energy Save Mode	Mains Cable Length

MMA/TIG machines

Origo™ Tig 3000i AC/DC, 4300iw AC/DC

Robust and powerful MMA/TIG welding machines

- Professional TIG AC/DC welding
- QWave - quiet and highly dynamic AC arc
- True AC Rating - correct display of the actual welding current
- Professional MMA welding with Origo Tig 4300iw AC/DC
- Adjustable ArcPlus regulation, HotStart, ArcForce and switchable polarity (DC)
- Water cooler with ELP, ESAB LogicPump (the water cooler starts automatically when the water cooled TIG torch is connected, preventing overheating)

Specifications - Origo Tig 3000i AC/DC					
Input Voltage	Setting Range		Amps Input at Rated Load TIG	Power Factor @ Max Current TIG AC	Power Factor @ Max Current TIG DC

MMA/TIG machines

Heliarc™ 281i & 353i AC/DC

For demanding TIG/MMA applications

- High quality TIG-welding - Exceptional performance across a wide variety of materials
- Excellent Arc control - Stable arc characteristics and settings provide excellent arc control and fast welding speed
- Hot start AC - Excellent arc starts at low Amp AC TIG welding
- AC or DC Pulsed TIG welding - Easy control of heat input and the weld pool. enhanced aesthetic weld bead appearance
- Dual TIG function - Switch between two weld current levels while welding via torch switch. Allows operator to manually control weld puddle fluidity
- Superior MMA performance - Even with 60XX electrodes
- Liftarc Mode even on AC - Ideal for applications where HF (High Frequency) is not permitted
- Inverter / microprocessor technology - Highly efficient with low input power requirements. Precise arc control coupled with low weight & size
- AC Pulsing 0.4-2 Hz - Ideal for thin gauge aluminum

MXL MIG Torches

For light/medium-duty fabrication

This second generation of MXL torches has gone through a complete look and feel redesign. The improved performance of all models targets industrial applications. Consumables are standard Euro style.

- High quality torch for industrial use
- Ergonomic handle with knuckle joint
- Both gas and water-cooled models available
- Soft grip areas for high comfort
(MXL 341, 411w and 511w)

PSF MIG Torches

For medium/heavy-duty fabrication

The next generation of PSF has been completely redesigned with front-end wear parts that remain fully compatible with the time-proven heritage PSF wear parts. The modern look and feel, as well as improved performance, make this the right tool for even the most demanding industrial applications.

- 4 sizes of gas-cooled & 2 sizes of water-cooled models
- PSF 260 with rotatable neck
- PSF 520W with dual-circuit cooling system for optimal performance
- Threaded gas nozzles secures a firm fit and better heat dispersion
- Very durable wear part system with robust tip Adaptor and long tips for toughest applications
- CuCrZr contact tips for long life
- Optional remote control module on selected variants

Specifications				
Model	Rated Output, Gas		Wire Size	Cooling
260	225 A @ 60% duty cycle, Mixed	250 A @ 60% duty cycle, CO ₂	up to 1.0 mm	Gas
315	285 A @ 60% duty cycle, Mixed	315 A @ 60% duty cycle, CO ₂	up to 1.2 mm	Gas
415	325 A @ 60% duty cycle, Mixed	380 A @ 60% duty cycle, CO ₂	up to 1.6 mm	Gas
515	400 A @ 60% duty cycle, Mixed	450 A @ 60% duty cycle, CO ₂	up to 1.6 mm	Gas
420W	450 A @ 60% duty cycle, Mixed	450 A @ 60% duty cycle, CO ₂	up to 1.6 mm	Water
520W *	500 A @ 60% duty cycle, Mixed	500 A @ 60% duty cycle, CO ₂	up to 1.6 mm	Water

* Dual-circuit cooling system (520w) ensure the critical front-end stays cool even under extreme conditions. Less heat means better wire feedability and fewer production stops to change wear parts.

MXH Push-pull MIG Torches

Excellent feeding reliability for high demands

The gas-cooled MXH 315PP and water-cooled MXH 420WPP push-pull systems are created for Robust Feed Pulse and Aristo Feed 3004.

- Permanent, stable feeding by precise feed rolls and high-performance motor
- Easy change between a straight- or 45° rotatable swan neck
- Quick change of feeder rolls without tools
- Potentiometer for easy remote access to wire-feed settings

Specifications

Model	Rated Output, Gas		Wire Size	Cooling
315PP	270 A @ 60% duty cycle, Mixed	310 A @ 60% duty cycle, CO ₂	up to 1.6 mm	Gas
420WPP	400A @ 60% duty cycle, Mixed	430 A @ 60% duty cycle, CO ₂	up to 1.6 mm	Water

For wear & spare parts, please see separate instruction manual.

PSF Fume-extraction MIG Torches

Fume extraction torches with excellent extraction capacity

Range of fume extraction torches with a reliable and robust design, made to capture the fumes directly at the source.

- Leather protected hose
- Robust steel knuckle-joint for improved mobility
- Remote and rotatable T-piece ensures that dirt and fume particles does not interfere with critical parts in the Euro connection
- Extensive and robust PSF wear parts system including CuCrZr tips as standard

Specifications

Model	Rated Output, Gas		Wire Size	Cooling

SR-B TIG Torches

Multi-functional and ergonomic TIG welding torches

SR-B torches are dedicated to quality. The torches are designed to provide convenience and versatility. Choose between gas-cooled or water cooled, with or without gas-valve and with optional flexible head to suit your individual application.

- Gas cooled torches always measured at 60% duty cycle. Water cooled at 100% duty cycle.
- Ergonomically formed handle with toggle switch.
- Cable assembly with swivel cable support on the handle
- The torches are also available with up/down function for ESAB CAN-bus controlled machines. (requires separate adapter)

XCT-B TIG Torches

High performance and compact design TIG Torches

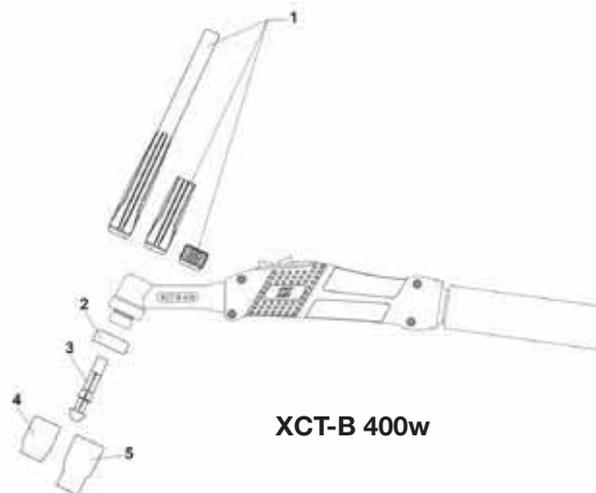

- Torch head and XCT collet have been carefully optimised. The torch achieves gas shielding that is comparable with using a gas lens
- Simplified system with only three extremely durable wear parts
- Equipped with the new Precision Switch technology allowing for precise operation with optimised ergonomics
- Extensively tested and a proven, compact design with high durability
- Extremely compact head size

HandyPlasma 35i/45i

Portable plasma cutting

Simple and intuitive LCD panel

Hand-held, light and portable power source for plasma cutting with a 220/ 230V 50/60Hz single phase power supply.

Very simple to use and with a colour LCD panel and all adjustments in just one knob.

No need to adjust the gas the machine automatically detects the inlet and outlet pressure. An automatic system purges gas after cutting, increasing the useful life of the consumables.

Available in two versions, HandyPlasma35i Recommended cutting capacity = 6 mm Maximum cutting capacity = 12 mm

HandyPlasma45i Recommended cutting capacity = 10 mm Maximum cutting capacity = 16 mm

- Light and portable, weighing only 13.5 kg (including torch)
- Easy to use 2.8" colour LCD panel, with all adjustments in just one knob
- Torch trigger 2T/4T function
- Torch trigger lock for greater safety
- Grate or plate cutting functions
- Comes with torch included
- Two-year guarantee for the power source and three months for the torch Visit

ESAB Cutmaster® 40

Highest power-to-weight ratio in its class

The Cutmaster® 40 with SL60™ 1Torch® is the perfect combination of end-user insight, advanced technology, and intelligent design. Packed with power and offering the highest power-to-weight ratio in its class, the Cutmaster 40 with SL60 1Torch also has best in class cutting arc length and the most empowering and engaging user experience no matter the application.

- Built for portability and durability with the integral multi-handle design
- 35% Duty Cycle depending on application.
- Automatic voltage input detection from 200-240V.
- Industrial SL60 1Torch with ATC® (Advanced Torch Connector)
- Up to 12 mm recommended pierce and cut capacity
- with up to 16 mm maximum sever
- Cutmaster Black Series electrode included for up to 60% longer life of consumable parts
- Industry leading 3-year warranty on power supply
- and 1-year warranty on torch

Specifications	
Amperage Output	15 – 40 A, continuously adjustable
Recommended Generator Size	8.0 kW
Open Circuit Voltage (OCV)	280 V
Input Voltage	200-240 VAC +/-10%, 50/60Hz, 1ph
Rated Duty Cycle	35% @ 40 A 60% @ 30 A 100% @ 20 A
Amperage Draw *	I _{eff} : 15.5 A @230V * 26A @ 230V
Input Power Cable	2.7 m length, 2.5mm ² input cable. 16A plug
Work Lead with Ground Clamp	4 m work cable with 50 mm connection
Gas Requirements	Compressed air
Operating Temperature Range	0° – 50° C
Operating Input Air Pressure Range	6.2 – 8.6 bar
Min Air Flow Requirements (cutting & gouging)	142-235 l/min
Recommended Cut	up to 12 mm
Maximum Sever	up to 16 mm
Pierce Rating	12 mm
SL60 Torch Duty Cycle	100% at 40 A @ 189 l/min air flow
Torches – for use with the Cutmaster 40	SL60 1Torch (supplied) SL60QD 1Torch
Dimensions L x W x H	460 x 200 x 320 mm
Weight	10 kg

1Torch Consumables Parts Application Guide

Drag Tip Cutting

The preferred method of cutting light gauge metal up to 6 mm thickness. Produces the best cut quality narrowest kerf width, fastest cutting speeds, and with little to no distortion. Traditional drag cutting was limited to 40 A or less; now with Thermal Dynamics TRUE Cut Drag Tip Series™ technology, it is possible to cut up to 60 A. For best results, use the Shield Cup with the torch tip in direct contact with the work (up to 60 A).

Standoff Cutting

The preferred method of cutting metal thicker than 6 mm and at current levels above 60 A. Provides maximum visibility and accessibility. Shield cup for ,standoff' cutting (with the torch tip 3 mm to 6 mm from the work piece). Use the shield cup body together with the deflector for extended parts life and improved resistance to reflect heat. This combination provides cutting results similar to the single piece shield cup, as well as easy changeover to gouging or drag shield cutting.

Drag Shield Cutting

This is an operator-friendly method of cutting between 70 to 120 A while maintaining a constant standoff distance. For metal thickness greater than 6 mm, simply drag the shield cap in contact with the work piece. Use the shield cup body with the appropriate drag shield cap matching the current level being used. This method is not recommended for cutting light-gauge sheet metal.

Gouging

A simple method of metal removal by angling the torch to a lead angle of 35°-45°, and using a gouging tip. While maintaining a constant standoff distance, this allows for only a partial penetration into the work, thus removing metal from the surface. The amount of current, travel speed, standoff distance, lead angle, and tip size will determine the amount of material removed and the profile of the gouge. You can use the shield cup body with either the gouging shield cap or the shield deflector. Also, you can use the single piece shield cup.

TRUE™ CUT CAPACITY

The ESAB Cutmaster 80 weighs in at a mere 19.5 kg while still offering superior cutting power. Don't let the size of this unit fool you, it's more than capable of cutting 25mm (1") with a maximum capability of 38mm (1-1/2"). This unit, like all other TRUE™ ESAB Cutmasters, is equipped with the 1Torch®. Packages include power source, SL60 1Torch, spare parts kit, air filter/regulator, work cable and clamp and power cable.

- True Cut™ – 25mm (1")
- Quick Disconnect Torch for easy maintenance or machine torch conversion
- Auto-Restrike on mesh or expanded metal for maximum productivity
- True-Guard™ roll bar for ultimate protection
- TD Surelok® technology for better quality cuts and longer parts life

TRUE™ CUT CAPACITY

The ESAB Cutmaster 100 weighs in at 28 kg and provides 100 amps of cutting power. This unit's light weight compact design makes it the most portable and powerful cutting machine available. This unit combined with the 1Torch® has a maximum cut capacity of 45 mm (1 3/4"). More cut capacity than any other system in its class! Packages include power source, SL100 1Torch, spare parts kit, air filter/regulator, work cable and clamp and power cable.

- True Cut™ – 35mm (1-3/8")
- Quick Disconnect Torch for easy maintenance or machine torch conversion
- Auto-Restrike on mesh or expanded metal for maximum productivity

ESAB Cutmaster™ 120

TRUE™ CUT CAPACITY

Specifications	
Recommended Cut	40mm
Maximum Cut	55mm
Pierce Rating	25mm
Max Amperage Output	120A
Output Power	15.4 kW
Dimensions	305mm x 381mm x 762mm
Weight	28.1 kg
Torch Air pressure	5.2 bar
Torch Air consumption	212 l/m
Input voltage	400V - 3 ph, 50/60 Hz
Duty Cycle	40% @ 120A
Amperage Draw	32A @ 400V, 3 ph

TRUE™ CUT CAPACITY

The ESAB Cutmaster 120, weighing only 28 kg and provides 120 amps of cutting power for a 40mm (1- 1/2”) recommended cut and 55mm (2-1/8”) maximum cut. This compact unit, like all other Cutmasters, comes standard with the 1Torch® providing you with the well known comfort and reliability famous throughout the industry. Packages include power source, SL100 1Torch, spare parts kit, air filter/regulator, work cable and clamp and power cable.

- True Cut™ – 40mm (1-1/2”)
- Quick Disconnect Torch for easy maintenance or machine torch conversion
- Auto-Restrike on mesh or expanded metal for maximum productivity
- True-Guard™ roll bar for ultimate protection
- TD Surelok® technology for better quality cuts and longer parts life

Cutting guide kit (deluxe)

Straight line cutting guide

Single stage air filter

Two stage air filter

1TORCH SL60/SL60QD/SL100

FEATURES

- Ergonomic handle with trigger release
- Easy replacement of wear parts, less wear parts
- New Advanced Torch Connector (ATC) quick disconnect option
- Excellent cutting ratios even at higher cutting speeds
- 1 year warranty

Technical Data* SL60 / SL60QD 1Torch	
Amperage Output, A	20-80
Operating Input Air Pressure Range	6.2 –8.6 bar
Air Flow Requirements	142 –235 l/s
Duty Cycle	100% at 60 A
Torch Air Pressure	5.2 bar
Torch Air Consumption	190 l/s

ADVANCED TORCH CONNECTOR (ATC)

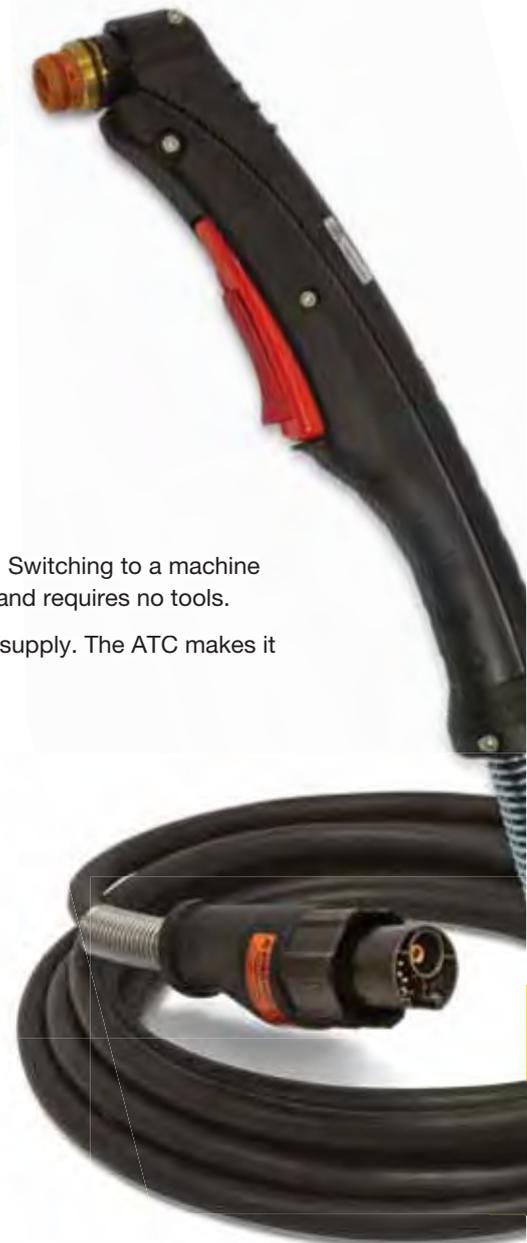

The ATC quick disconnect design brings extra flexibility to almost any plasma system. Switching to a machine torch, swapping out a damaged unit, or simply changing lead lengths is done quickly and requires no tools.

ATC Lead extensions offer the flexibility of working up to 30.4m away from the power supply. The ATC makes it easy to add or subtract total torch lead length as requirements change.
